we embrace

## SHADOWS

The Stoneline collection is inspired by a sedimentary rock characterized by different types and sizes of detrital fragments which have amalgamated together over time. This material, cut perpendicularly, creates a harmonious and elegant texture with stripy vein patterns and strong colors. The surface highlights the stratification of the rock with streaks, some more obvious than others, that alternate with uniform areas to create unusual variegated effects of timeless beauty. The delicate colors and highly detailed surface patterns make it versatile and suitable for traditional or contemporary styles paired with different materials like colored elements and wood.

color and material variations  
enhance the allure  
of a stone rich in history

# dynamic surfaces for atmospheric spaces

Stoneline encapsulates all the charm of a contemporary stone that combines tactility with soft hues - a range of four warm colors in the  $23\frac{5}{8}'' \times 47\frac{1}{4}''$  and  $11\frac{13}{16}'' \times 23\frac{5}{8}''$  rectified sizes - ideal for floor and wall covering applications in both residential and commercial settings. The collection is complete with a decor in the colors of the plain tiles made from a 3D structure that is able to exalt the incredible variability of the surfaces with light and shade effects that bring out the evocative aesthetic of the wall compositions.
