## PATTERN PLAY

L'ispirazione per Paprica, la nuova serie di pavimenti e rivestimenti 1741 nasce dallo stile Memphis, la corrente di radical design che ha saputo trasformare gli interni della Milano anni '80. Da questa tendenza eccentrica e provocatoria, Paprica prende in prestito l'originalità grafica e la voglia di stupire.

Paprica, un'interpretazione ultra-moderna del concetto di decorazione, un omaggio alla storia dell'interior design italiano, una proposta ceramica in piccolo formato decisamente innovativa e d'impatto.

The inspiration for Paprica, the new 1741 series of floor and wall tiles, comes from Memphis style, the radical design current that turned around interiors in Milan in the 1980s. From this eccentric, provocative trend, Paprica has borrowed the original graphics and the desire to take the observer by surprise.

Paprica, an ultra-modern interpretation of the decoration concept and a tribute to the history of interior design, is a decidedly innovative, striking series of small ceramic tiles.

## PATTERN PLAY: ESSENTIAL BLACK AND WHITE

Paprica, la nuova collezione 1741 di Marca Corona, scommette su una doppia anima cromatica e un'incredibile espressività grafica per trasformare il gres porcellanato in un elemento design sorprendente. Il concetto di decoro grafico viene reinventato attraverso patterns stilizzati dalle geometrie decise, che vengono addolciti magistralmente attraverso nuances neutre ed eleganti. Declinati sulle 3 tonalità più soffuse, il bianco, il grigio e il nero, questi originali patterns geometrici riescono infatti ad adattarsi ad ogni ambiente e progetto, donando un tocco personale, moderno e raffinato anche agli interni più minimali.

Le cementine esagonali Paprica, attraverso i loro 4 decori singoli o l'originale Mix multi-soggetto, possono trasformarsi in vere e proprie composizioni artistiche, quadri o tappeti accattivanti, capaci di caratterizzare ogni ambiente, pubblico e privato.

Paprica, the new 1741 collection by Marca Corona, focuses on two colour groups and incredibly expressive graphics to turn porcelain stoneware into a surprising design element. The graphic design concept has been reinvented through stylised patterns with striking geometries, beautifully toned down with elegant, neutral shades. Featured in three soft shades of white, grey and black, these original geometric patterns are able to adapt to any setting or project, bringing a modern, sophisticated, personal touch to even the most minimal interiors.

The Paprica hexagonal cement tiles, with their 4 individual decorations or the original multi-subject Mix, can be turned into authentic artistic combinations, eye-catching details or all-over patterns able to bring a touch of character to any public or private setting.
