SOLID

WOW
SOLID

A new geometry in perfect balance.

A tool to allow freedom of design through an elegant range of colours in 5 modular sizes.

Pushing the boundaries, the key ingredients are: porcelain, rectified, coloured through body and its modularity as the inspiration for efficient design.

Innovative and combinable in an infinite number of ways.

WAREHOUSING

In order to guarantee the characteristics of the finish the product must be kept in its original packaging until the time of fixing. If the product is likely to be stored for a long period of time it should be suitably covered.

TILE FIXING

To ensure the products adhere correctly to the surface, it is essential to use specific adhesive and grouting material. This must also be suitable for the environment they will have to withstand. Fitting with traditional mortars does not ensure good adhesion.

Fitting tiles without joints is not advisable from any technical point of view as this may lead to various problems. All formats in this collection are modular and combinable with each other. For an optimal result we advise to use 1,5 mm (0.06") grout.

MAINTENANCE AND CLEANING

Once the materials have been fitted, it is advisable to remove any remaining adhesive and grouting material by using a commercial descaling product designed especially, diluted with water. The descaling product must not remain in contact with the surface to be cleaned for more than 5 minutes.

As a general guideline, powder detergents should not be used, not wire wool or abrasive materials. Generally a sponge will be sufficient with warm water and liquid neutral soap. Then rinse with plenty of clean water.

Dry-pressed ceramic tiles with water absorption B Ia ≤ 0.5% for interior and exterior floors and walls. Baldosas cerámicas prensadas en seco con absorción de agua B Ia ≤ 0.5% para suelos y paredes interiores y exteriores.
