

FOREST

ENGINEERED HARDWOOD FLOORING

AN
AMERICAN
ORIGINAL

The Forest Collection is our most hand-crafted, rustic and sculpted floor. This collection features wood species from the Northern forest region in America, characterized by its slow-growth, highest quality hardwood timber with fine graining.

The planks are finished in beautifully warm and rich colors to emphasize the tight graining characteristics. Our 2.5mm rotary-cut style combined with wide, 7 inch planks and longer random lengths up to 6' creates an expansive, exclusive and timeless design that will enhance any interior space.

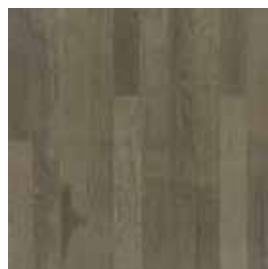

PLANK DIMENSIONS: 1/2" X 7" X 72"
