

INAX

ABOUT INAX

The history of INAX can be traced back over 100 years, to when our forefathers partnered with the preeminent American architect Frank Lloyd Wright in their relentless efforts to create and curate the finest tile in the world – the tile that would be used to build the Imperial Hotel. By determining the properties of clay and the impact of fire, through numerous trials, they succeeded in the large-scale production of the decorative tiles that were both unique and proprietary to Japan's most grand hotel. This is the foundation of INAX.

JAPANESE TILE WORLD

INAX Japanese Tile World is inspired by the Japanese tradition of living in harmony with nature. Each unique collection of tiles builds on the beauty of nature such as changing seasonal hues, rural scenery, the flow of waves, and more. Incorporating traditional motifs and techniques, they offer a dynamic play of light and shadow, created through intricately designed shapes or carefully calculated differences in thickness. These sophisticated tile designs set the tone for simple yet striking, modern spaces.

YOHEN

"Finger Tile"
This exquisite tile with its gently variegated tones and glazed finish is a beautifully crafted, architectural ceramic inspired by the earthen tones of traditional Japanese pottery and a traditional Japanese confectionery known as yohkan.

YUKI

The Yuki name comes from the Japanese words for glaze (Yu) and seasons (ki). Each color variation evokes an essence of the seasons. The standard white color represents winter snow, the red represents the summer sun and the black represents the night sky in a mid-autumn day. The gently curved Yuki form is naturally created by using split bamboo, a popular material in Japan.

SENTOUSAI

“Kawarabei” Traditional artisans in Japan had an eco-aware custom of reusing old roof tiles of various shapes as material for the exterior walls of new houses. These walls show fragments of these roof tiles kneaded into them. INAX’s Sentousai tiles recreate the natural textures of these kawarabei, i.e., plaster (mud) walls. Three types of tiles, all with different thicknesses, make up Sentousai. The lights and shadows produced by these differences in thicknesses are a unique feature of these unusual Sentousai tiles.

Material: Stoneware/Glazed
Size/Piece: 235 x 13 mm (9.25 x .51 in)
Size/Sheet: 235 x 88 mm (9.25 x 3.46 in)
Thickness: 22 mm
Joint: 2 mm
Sq.Ft./Carton: 6.89
Sheets/Carton: 30
Mounting: Back net-Fiberglass
Weight/Carton: 40.3 lbs

* Open joint (Non-Grouting) application is required to install Sentousai.

* Grey thin-set /adhesive is recommended to install Sentousai as the back joint color of this collection (all colors) is grey.

ECOCARAT

Rooted in traditional Japanese mud-wall construction, Ecocarats comprises a superbly designed selection of interior wall-finishing materials. Infused with a feel of natural material content and coloring daily scenes with magnificent spirit, Ecocarats can create spaces that extend authentic relaxation, unmatched discernment in taste, and never-before-experienced refreshing imagery. Moreover, installation can help with moisture-regulating performance that can help regulate indoor humidity. Genuine beauty comes alive across the five senses through wise Japanese tradition.

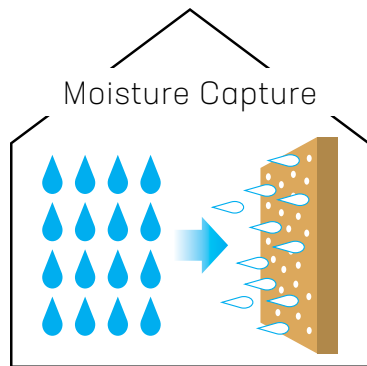

MECHANISM OF ECOCARAT

Ecocarot has pores to catch and release air. The pore size is 1 nanometer (a millionth of 1 mm). The plentiful number of pores further helps air exchange, even when compared to diatomaceous earth.

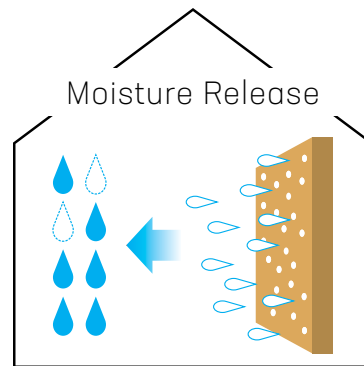

MOISTURE REGULATION

Indoor humidity fluctuates throughout the day, according to the weather air temperature, not just between the seasons. Ecocarot helps to regulate humidity indoors. Indoor moisture regulation works like breathing.

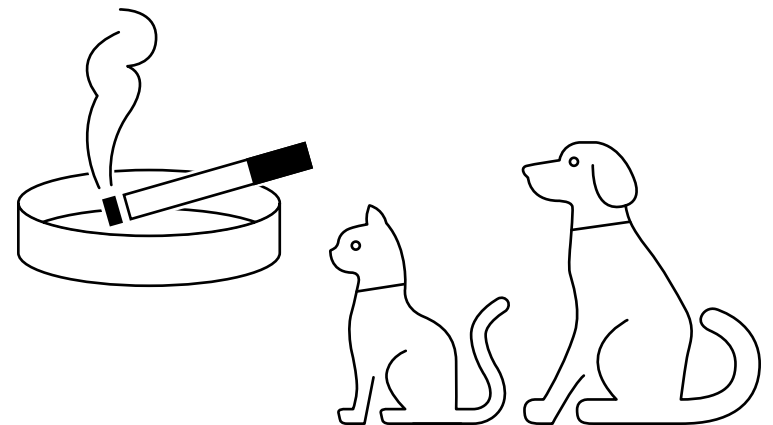

High humidity in a room helps regulate moisture.

Low humidity in a room helps regulate moisture.

DEODORIZING FUNCTION

Unpleasant odors from everyday living emanate from the toilet, spoiled garbage, tobacco, and pets. The microscopic pores of Ecocarot can help manage foul odors.

GRANAS VAGUE
