LEED COMPLIANT CREDIT MR

GREENGUARD CERTIFICATION
This series is made in a production plant that is GOLD GREENGUARD certified.

PANARIA AND THE ENVIRONMENT

100% REUSE OF UNFIRED TILES
Crude waste generated by the process is reintegrated in the production cycle with no costs for the environment. This contributes to the safeguard of natural resources.

100% REUSE/RECYCLING OF THE INDUSTRIAL WASTE - FIRED TILES
The waste-fired tiles are fully reused in the production cycle. In addition, at the end of life, the tiles Panaria can be recycled as materials for substrates for roads and buildings, thus reducing the use of gravel and natural aggregates commonly used in building.

100% WATER RECYCLING
The water used in the production process is recycled. The water demand is strongly reduced by this mean.

PANARIA PACKING MATERIAL IS 100% RECYCLABLE
Carton boxes, plastic packaging materials, wooden pallets, straps, etc.

100% OF NON CERAMIC WASTE
Is differentiated and recycled in other production cycles.

SAFETY REQUIREMENTS: NO FIRE REACTION
All of Panaria's ceramic tile products are Class A building materials as described in ASTM E84 - Standard Test Method for Surface Burning Characteristics of Building Materials. This is due to the flame spread rating of (0) and smoke developed rating of (0) falling within the ranges of a Class A material. Other building codes refer to this as a Type I material in accordance with NFPA 255.

METHANE CONSUMPTION IS HIGHLY REDUCED
By the use of up to date technologies and customized installations.

LOW EMISSIONS IN THE ATMOSPHERE
Panaria production plant strictly complies to US Standards with a very small amount of gas emissions in the atmosphere.
